SOURCE DESCRIPTION:

This General Permit is being written to include all Title V Major Source Landfill Gas to Energy Projects in the Commonwealth of Kentucky. A general permit was chosen because of the vast similarities between these projects, the relatively few applicable requirements for any given location, and the ease with which revisions and renewals can be made to the permit itself.

Landfill Gas to Energy Projects, for the purposes of this General Permit, receive landfill gas as fuel for internal combustion electric generating engines. These combustion engines, when in operation, act similar to flares as control devices.
